

VIRUSOLVE®+

Dosing Instructions

Infection Control

For carpet cleaning

One step solution providing hospital grade cleanliness for care homes without the need for any pre surface cleaning. Virusolve+ has been independently proven to destroy viruses, bacteria, spores and fungi, killing everyday bacteria within 1 minute of contact and destroying superbugs in 5 minutes including MRSA, C.diff and HCV. Virusolve+ creates a residual barrier that continues to fight infection for up to 7 days.

- 1** Spray the affected area where bodily fluid has come into contact with the carpet using Virusolve+ trigger spray.
- 2** Leave insitu for 15 minutes.
- 3** Dilute Virusolve+ as per instructions below and add to carpet cleaner.

Dilute 2 x 25ml pumps per 1 litre of water (5%)
into a bucket/container
(push pump fully down, 1 full pump = 25ml).

Transfer into carpet cleaner.

When making up solution from concentrate you must wear personal protective equipment: gloves, apron and eye protection/face visor.
