

VIRUSOLVE®+

Trigger spray refilling instructions

Infection Control

One step solution providing hospital grade cleanliness for care homes without the need for any pre surface cleaning. Virusolve+ has been independently proven to destroy viruses, bacteria, spores and fungi, killing everyday bacteria within 1 minute of contact and destroying superbugs in 5 minutes including MRSA, C.diff and HCV. Virusolve+ creates a residual barrier that continues to fight infection for up to 7 days.

Product should be delivered as a jet spray and not a mist to avoid inhalation.

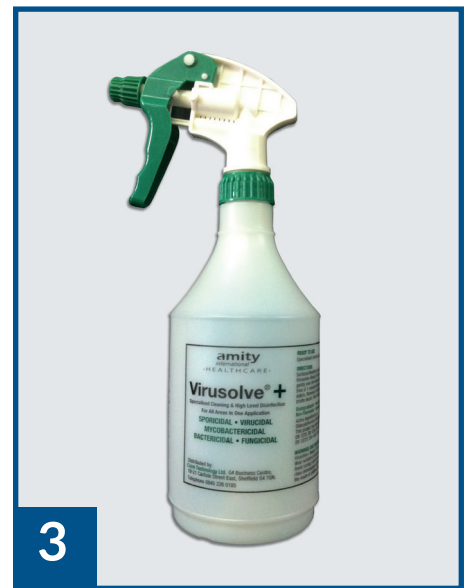

1

Take an empty trigger spray bottle and unscrew the top. Fill with 700ml of water.

2

Add 50ml of concentrated Virusolve+ (2 x pumps).

3

Screw the trigger spray top back on, ensuring it is fitted tightly. Turn the bottle upside down and back again two to three times to mix the contents. Ready to use.

When making up solution from concentrate you must wear personal protective equipment: gloves, apron and eye protection/face visor.
